BUMP OR DOUBLE

Propeller
Take learning further

For 2 players. You need: a spinner and 21 counters.

How to play

- Players need a set of counters in one colour each
- Take turns to spin the spinner and multiply the number you land on by ⬟
- Find the answer on the board and cover it with one of your counters
- If you get an answer which is already covered, you can 'bump it' and cover it with your counter, and the other player has to take their counter away
- If you get an answer that's already covered by one of your own counters, you can put another counter on top and to make it a 'double stack'
- A double stack can't be bumped, so if you spin a number with a double stack, you miss a turn

The winner is the first person to make 5 double stacks
