

# CONNECT 5

For 2 players. You need: a 1-12 dice and 19 counters.

## How to play

- Choose someone to go first
- The player rolls the dice and multiplies the number by 5
- The other player checks their answer
- If the person who rolled can find that number on the board, they can cover it with one of their counters
- Keep taking turns to roll and cover the numbers
- You are trying to cover counters that are connected by lines - they don't need to be in a straight line as long as they are connected

The winner is the first person to cover 5 connected numbers
