

MATCHING ANSWERS

For 2 players. You need: a 1-6 dice and 20 counters.

How to play

- Place a counter on the black circle
- Take turns to roll the dice - this is the number of moves you can make in either direction
- Look at the number you land on and, if you can find a hexagon with a matching calculation, cover it with a counter in your colour

The winner is the first person to cover 3 hexagons in a straight line
