

FILL THEM IN - 3

For 2 players. You will need: a 1-6 dice, 12 counters and two pencils.

How to Play...

- Take it in turns to roll a starting number, write it in one of the pink circles, and place a counter on each
- Player 1 rolls the dice and takes that number of steps, counting in multiples of 10, on either track and writes in the last number they land on
For example, if the starting number was 3 and Player 1 rolled a 4, they would count 13, 23, 33, 43 and would write the number 43 in the blank circle
- If you can write your number in, collect a counter, but if you can't then don't!
- Keep taking turns to roll the dice and move up and down each number track

The winner is the first person to win 6 counters!

PLACE VALUE
I CAN COUNT ON AND BACK IN STEPS OF 10 FROM ANY 1 DIGIT NUMBER
