

TOP OF THE PILE

For 2 players. You need: a 1–12 dice and 40 counters.

How to play

- You need 20 counters each
- Take turns to roll the dice
- Multiply the dice number by 2
- Your partner will check your answer
- If you are correct, find the answer on the board, and place one of your counters under the number so you can still see it
- If there is already a counter under the number, place your counter on top of the other one
- Keep taking turns until you have both placed all of your counters.
- Look for any numbers where your colour of counter is on the top of the pile
- You win these piles and take all the counters
- Count how many counters you have from your winning piles

The winner is the person with the most counters

10	18	4	14
16	2	24	6
8	20	12	22
