

# Fill Them In Game 2

## True or False?

If I count in tens from zero, I will say the number 110.

Explain your answer.

## What is wrong with the sequence below?

130, 120, 111, 100, 90,  
80, 90

Explain your answer.

Jamal has to change the studs on his team's football boots. Each pair of boots has 10 studs. He has 13 team mates. How many studs does he need?

Rupal says...

"If I count on 10 multiples of 10 from any number on the game board, the last 2 digits of my number will stay the same."

Is he correct?

## Always, Sometimes, Never?

All multiples of 10 end in zero.
