

PICKING DICE

For 2 players. You need: six 1-6 dice and 25 counters.

How to play

- Take turns to roll 6 dice together
- You are going to make 3 pairs – you should add one pair, add another pair, then multiply them together
- You do not need to use the last pair, so pick your four numbers carefully!
- There are boxes below you can put the dice in to help you
- If you can find the answer to your calculation on the board, cover it with one of your counters

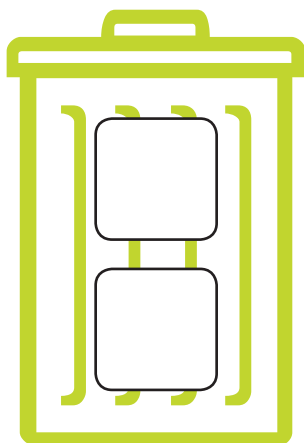

The winner is the first person to cover 3 in a row in any direction
