

Property Match Game 2

Below are three digit cards...

3

6

5

Write all the three-digit numbers you can make using the digit cards and then order these from smallest to largest

Use “is greater than, is less than or is equal to” to compare the numbers below...

487 427

50 tens 450

4_6 46_

Daisy puts the following numbers in order:
256, 128, 228, 352, 96

She says, “The fourth number is 228”.

Is she correct?

True or False?

To decide which number is the largest, you look at the tens column first

Explain your answer.

Write a set of targets such as ‘highest even number’, ‘lowest odd number’, ‘multiple of ten’ and then pick one in a pair. Pull cards one at a time from a set of 0-9 cards. Decide where to place your card in a 3-digit number and continue to pick cards until you have made the number. Who got closest to the target?
